Summary

- Data professional with 3 years of experience, proficient in SQL, Python, and a wide range of data tools. Skilled in building and optimizing complex data workloads, delivering scalable solutions that power business operations. Known for tackling challenging data problems with a blend of technical skill and a keen eye for detail. Driven by curiosity and a passion for continuous learning.

Work Experience

Bluetab America

Big Data Technician

March 2023 – Present

- Collaborated on migrating PySpark workloads to Snowflake.
- Built custom ad-hoc functions in Snowpark to optimize data workflows.
- Ingested data using Spark.
- Developed Spark Scala use cases for end-user accessibility.
- Used agile frameworks to achieve the team's objectives.

Muni Tienda

Growth Analyst

Dec. 2021 – Nov. 2022

- Developed complex SQL queries for data analysis and insight generation
- Created a density map in Jupyter using Python libraries (Pandas/H3) to support the sales force strategy
- Created and automated performance management dashboards in Google Sheets
- Developed a CRM in AppSheet to help the Offline acquisition team, enhancing analysis and decision-making
- Supported the planning, execution, and analysis of weekly growth initiatives to increase active users, GMV, AOV, and purchase frequency.

Skills

Programming Languages: SQL, Python, Scala

Data manipulation: PySpark, Snowpark, Pandas

Tools & Cloud Platforms: Snowflake, Jupyter Notebooks, Git, Control-m, Jira

Education

Bachelor, Biotechnology

Universidad Politécnica de Pachuca

Dec. 2019

- Fundamentals of Data Analysis.
- Comprehensive and applied knowledge of statistics in research projects.

Certifications

- Snowflake - SnowPro Core
- Microsoft - Azure Fundamentals AZ-900
